

## Sauvignon Blanc Kalkstein

0,75 L

The profile of the limestone soil is characterised by chalky and porous layers of rock that contain a lot of calcium and magnesium. This terroir allows the vine to take deep root and significantly promotes the development of the Sauvignon Blanc vine's flavour. Fresh exoticism, crisp acidity – a full-bodied wine with flavours of citrus fruit and passion fruit paired with the characteristics of the limestone soil. A wine with an unmistakable varietal profile.
