

Riesling Kalkstein

0,75 L

Limestone was created millions of years ago: limestone reefs were deposited along the coast of a primordial sea in the Pfalz and these were able to develop into solid rock material over a long period of time.

The perfect relationship between this porous limestone soil and the Riesling grape is reflected in this Riesling with its smoky minerality and elegant citrus fruit

An elegant and taut Riesling to enjoy with and without food.

Country of origin / region

Germany, Pfalz
